SUMMARY

I am a learn-it-all Lagos-based Nigerian, who enjoys using new technologies to build effective and relevant solutions/tools. I specialize in ReactJS/Redux/ApolloClient, NodeJS/Express/AdonisJs, and Python/Flask/Django, Redis/elasticsearch/RabbitMQ, MongoDB/MySQL, CI/CD/Docker/Kubernetes, worked with go to build an API gateway and I'm experienced in executing projects from concept to delivery while working in a software development team.

WORK EXPERIENCE

Fullstack Developer, Ventrata (contract) - August/2021 - present - Remote, London(EMEA)

Ventrata is a proven and versatile booking platform built for high-volume tours and attractions, With contactless booking, payment, and check-in solutions. We can provide the perfect solution to all your booking needs

- Worked on 3rd-party and Online Travel Agents(OTA) interactions and cloud applications which is a bridge between all OTA's and API providers.
- Improve code base quality by conducting analysis, and recommend changes in policies and procedures
- Researched new technologies and best practices
- Identified bottlenecks and bugs, and devised solutions to the problems identified

Fullstack (Backend heavy) Developer, chiji14xchange (full-time) - July/2020 - August/2021 - Lagos,

Nigeria

Chiji14xchange is a digital currency exchange platform that provides trading solutions to users all over.

- Collaborated with other software developers to maintain and improve both main products and internal tools.
- Improved the development process, by suggesting and adding to the suggestions for getting development more seamless.

Software Developer, Toga-insurance (contract) - January/2020 - June/2020 - Lagos, Nigeria

I work with local businesses in building a tool to ease their process of operating their business.

- Collaborated with other software developers to maintain different products.
- Worked on the front-end of the app
- Organized the development of the products used

Software Developer(full-stack), Andela - June/2018 - November/2019 - Lagos, Nigeria

Andela invests in Africa's most talented developers and integrates them into the world's best tech companies.

- Collaborated with other software developers to maintain the back end of an in-house asset management tool(Activo).
- Worked in an agile(scrum) methodology
- Effectively communicated with product managers and fellow engineers, to map out software requirements for each application feature.
- Tested solutions for effectiveness.
- Implored continuous integration tools, like circle-ci, to secure existing features and minimize the introduction of bugs.
- Built full-stack web applications using ReactJS, NodeJs, PostgreSQL.

SIDE PROJECTS

Customar: An issue ticketing platform that enables companies to track their SLA's and other issues from start to finish seamlessly. (worked on the backend and it is written in NodeJS/AdonisJS)

Author's Haven: A Platform for the creative at heart to share their thoughts on numerous tech-inclined topics (ReactJS, PostgreSQL, Redux, HTML, CSS, SCSS, NodeJs)
